# NEW State Pollutant Discharge Elimination System (SPDES) General Permit For Stormwater Discharges from Construction Activity Permit No. GP-0-15-002 and Proposed Changes to the New York State Stormwater Management Design Manual

***Comment period has ended 9/2/14***

***DOW is working on responsiveness summary and making  
changes.***

The NYSASWM issue being that: to be in compliance with the NYS Stormwater Management Design Manual, the permittee would have to develop a Stormwater Pollution Prevention Plan (SWPPP) that meets both the “Required Elements” and “Design Guidance” included in the Design Manual. NYSASWM is expressing that the permittee should only have to meet the “Required Elements”.
